

## Project Profile: Philip S.W. Goldson Highway Upgrading Project

This project will make major upgrades to sections of a key arterial route linking Belize City to the Mexican border, resulting in enhanced regional trade, and opportunities for increased agricultural production and tourism. The focus will be on the section of the highway between "Mile 24.5" and the Mexican border (mile 62). The design will incorporate improved climate resilience, and build on existing road safety initiatives.
