

THE CARIFORUM-EU EPA CSME STANDBY FACILITY

The project was approved for implementation by the CARIFORUM-EU Economic Partnership Agreement (EPA) and CARICOM Single Market and Economy (CSME) Standby Facility for Capacity Building Steering Committee in 2021.

The EPA and CSME Standby Facility is a EUR 8.75 million programme financed by the European Development Fund (EDF) being managed by CDB to support projects in Antigua and Barbuda, The Bahamas, Barbados, Belize, the Commonwealth of Dominica, the Dominican Republic, Grenada, Guyana, Haiti, Jamaica, Saint Lucia, St Vincent and the Grenadines, Saint Kitts and Nevis, Suriname, and Trinidad and Tobago (CARIFORUM). It is intended to build capacity in the region and better position businesses to trade within CARIFORUM and the European Union.

CARIFORUM

ABOUT

This two-year project provides solutions to challenges faced by Belize's cacao industry including constraints to productivity, quality, value addition and export development.

Implementation is centralised in the country's Toledo district, where cacao is cultivated by hundreds of smallholder farmers. The project encourages good agricultural practices for the production of high-quality beans for certification. It also facilitates added value of cacao through the establishment of a processing facility.

These improvements will strengthen the national value chain, and promote acceptance of Belizean cocoa-chocolate by the European Union (EU), where certified cacao products are in high demand.

The project is implemented by the Toledo Cacao Growers' Association (TCGA) with support from the EU and the Caribbean Development Bank (CDB).

PROJECT BENEFITS

Ultimately, this initiative will lead to inclusive and sustainable economic growth by improving the capacity of the TCGA and its farmers to meet international standards and fulfill unique selling points for Belize cocoa and cocoa products.

Its main benefits include:

- Provision of a processing facility with operational equipment and training to process cacao beans.
- Support for Fairtrade and organic certification.
- Access to greater marketing channels through a new website and online presence.
- Boost in returns from productivity and on-farm labour.
- Increase in farmer incomes and strengthened target communities.
