Business Description

Our company is an event setting organization which takes day to day disposables such as drift wood, glass, plastic bottles, fabric and trimmings and turn them to renewable resources to set the ambience for any event. We also use this medium as a social entrepreneurship to teach others the skills and sell our products while cleaning the environment. Lets use innovation for your special occasion, from trash to treasure we'll make it work, a lasting memory with beauty and style.

Business Module Canvas
